

Improved Automated Model Generation and Agent-Group specific Model Analysis

MATSim User Meeting 2026

Simunto

Creario

Improved Automated Model Generation

Simunto

Introduced at MUM25

Pipeline to create MATSim models for any place on earth

Comprehensive, multi-modal MATSim models

- Network
- Public Transport
- Facilities
- Population
- Detailed report

Get started with a full MATSim model within hours instead of months!

Improvements since last year

Models can now be created for free!

	Free Models	Paid Models
Maximum region size	150 km ²	20,000 km ²
Maximum population sample	25%	100%
Multi-modal network	✓	✓
Custom GTFS	✓	✓
Custom population data	✗	✓
Turn restrictions	✗	✓
External commuters	✗	✓
Opening times for all facilities	✗	✓

Create your own model now at creario.simunto.com!

Tramola

In-depth scenario analysis for everyone

Simunto

Scenario

Prolongation of a tram line

<https://glattalbahn.ch/glattalbahn/>

Difference in Passenger Volumes

for tram line 10 with and without tram prolongation.

Difference in % of PT Mode Share

Cells are scaled by trip count.
Cells with < 2500 trips are hidden.

Flow Bundle of Passengers

who travels on the tram prolongation in either direction.

Full Modal Split

Cells are scaled by trip count.
Cells with < 2500 trips are hidden.

other

Intersection Flows over Network

Network volumes and intersection flows showing buses only.

Boarding and Alighting Passengers on Tram 10

towards Zürich, Central →

Passengers on Board

Extension

Boarding Passengers

Extension

Alighting Passengers

Extension

Glatttalbahn

Base Case

Kloten, Oberfeld (Tram)

Boardings and Alightings

Passenger movements at the selected public transport stop or station.

Total Pax: 708

Boarding and Alighting Passengers

Arcs with less than 20 passengers filtered

In the morning
7:00 — 9:30

Arriving
Departing

In the evening
16:15 — 18:45
